We are looking for the next possible date, full time, for an

Angular TypeScript Developer (m/f/d)

About FLEXOPTIX

Since 2008, Flexoptix has been successfully developing and marketing solutions for network transceivers under the motto "Less bullshit more engineering". We are in the telecommunications sector and, with more than 65 employees, we have positioned ourselves in an internationally growing market thanks to our "orange" and pragmatic mindset.

Benefits of working with us include:

- Germany's largest natural Christmas tree, on our technology campus
- Company pension plan, IT and office equipment as requested, health and sports offers, fresh fruit, cereal, mineral water, tea and coffee
- You are invited to personal development through workshops, conferences, language courses, advanced training and webinars
- Our office is easily accessible by public transport (our "Kuehler Grund" bus stop is on campus); by car (5 minutes from the A5 exit); and by bike (covered bicycle parking space and warm showers are available)
- International customers and partners in almost 100 countries
- Great colleagues - our "orange" team is international and welcoming
- A pleasant and modern working environment in a company that develops positively even in challenging times and invests in the future
- Suggestion-based work and the opportunity to implement creative ideas

As an Angular TypeScript Developer (m/f/d), you will be responsible for:

- Use web technologies to develop our frontends in the browser and on the desktop
- Operate and maintain the Flexoptix applications
- Work in a three-person team self-organized and independently on our software
- Analyze requirements and work out solutions together

Role requirements as an Angular TypeScript Developer (m/f/d):

- You have a degree, a completed training in the field of computer science or comparable
- Proficient in TypeScript, Javascript, HTML, CSS in a modern frontend framework e.g. Angular, React or Vue.js
- Understanding of asynchronous code and RxJS
- Comfortable with "collective ownership", SOLID, clean code
- Comfortable with tools like git, Bitbucket, Jira and Jenkins
- You have knowledge in Electron and NodeJS (optional)
- You speak German and English

If this role aligns with your skills and experience, please send your complete application, including salary expectations and desired starting date, to:

jobs@flexoptix.net

We look forward to reviewing your application!
