

We are looking for the next possible date, full time, for a

Business Intelligence Enthusiast (m/f/d)

About FLEXOPTIX

Since 2008, Flexoptix has been successfully developing and marketing solutions for network transceivers under the motto "Less bullshit more engineering". We are in the telecommunications sector and, with more than 65 employees, we have positioned ourselves in an internationally growing market thanks to our "orange" and pragmatic mindset.

Benefits of working with us include:

- Germany's largest natural Christmas tree, on our technology campus
- Company pension plan, IT and office equipment as requested, health and sports offers, fresh fruit, cereal, mineral water, tea and coffee
- You are invited to personal development through workshops, conferences, language courses, advanced training and webinars
- Our office is easily accessible by public transport (our "Kuehler Grund" bus stop is on campus); by car (5 minutes from the A5 exit); and by bike (covered bicycle parking space and warm showers are available)
- International customers and partners in almost 100 countries
- Great colleagues - our "orange" team is international and welcoming
- A pleasant and modern working environment in a company that develops positively even in challenging times and invests in the future
- Suggestion-based work and the opportunity to implement creative ideas

As a Business Intelligence Enthusiast (m/f/d), you will be responsible for:

- The development and implementation of concepts for the extraction, transformation and integration of our company data in a data warehouse in line with the requirements of our data consumers
- Data analysis, reporting and dashboarding
- Looking after the ERP processes that are connected to the business intelligence

Role requirements as a Business Intelligence Enthusiast (m/f/d):

- A degree or an apprenticeship in the field of business informatics or computer science
- Good understanding of ERP systems and the data structures
- Enthusiastic about the optimization and automation of our ERP-supported processes
- Interest in the further development of BI tools and have experience in creating SQL queries and operating Microsoft SQL servers
- Good knowledge of German and English

If this role aligns with your skills and experience, please send your complete application, including salary expectations and desired starting date, to:

jobs@flexoptix.net

We look forward to reviewing your application!
