For the summer semester 2023 we are looking for you as a

Dual Student Bachelor of Science – Computer Science (m/f/d)

About FLEXOPTIX

Since 2008, Flexoptix has been successfully developing and marketing solutions for network transceivers under the motto "Less bullshit more engineering". We are in the telecommunications sector and, with more than 65 employees, we have positioned ourselves in an internationally growing market thanks to our "orange" and pragmatic mindset.

Benefits of working with us include:

- Germany's largest natural Christmas tree, on our technology campus
- Company pension plan, IT and office equipment as requested, health and sports offers, fresh fruit, cereal, mineral water, tea and coffee
- You are invited to personal development through workshops, conferences, language courses, advanced training and webinars
- Our office is easily accessible by public transport (our "Kuehler Grund" bus stop is on campus); by car (5 minutes from the A5 exit); and by bike (covered bicycle parking space and warm showers are available)
- International customers and partners in almost 100 countries
- Great colleagues - our "orange" team is international and welcoming
- A pleasant and modern working environment in a company that develops positively even in challenging times and invests in the future
- Suggestion-based work and the opportunity to implement creative ideas

You will be responsible for:

- Application of all study-relevant contents, which come to bear in the context of the operation of an ERP system
- Automation of business processes by means of object-oriented analysis and design
- Development and use of databases
- Software engineering in cooperation with colleagues from the developer teams
- Development and enhancement of web-based applications
- Due to technical interfaces to internal IT: computer networks and IT security

Role requirements:

- Advanced technical college entrance qualification or high school diploma
- Confident in using MS Office programs and ideally already have some programming experience
- Digital trends, IT topics and business contexts are of interest to you
- Organizational talent and fun working in a team
- Technical understanding and the willingness to deal with our products
- Ideally first experiences through internships or vacation jobs

If this role aligns with your skills and experience, please send your complete application to:

jobs@flexoptix.net

We look forward to reviewing your application!
