

We are looking for the next possible date, full time or part time, for an

ERP Supervisor / Administrator (m/f/d)

About FLEXOPTIX

Since 2008, Flexoptix has been successfully developing and marketing solutions for network transceivers under the motto "Less bullshit more engineering". We are in the telecommunications sector and, with more than 65 employees, we have positioned ourselves in an internationally growing market thanks to our "orange" and pragmatic mindset.

Benefits of working with us include:

- Germany's largest natural Christmas tree, on our technology campus
- Company pension plan, IT and office equipment as requested, health and sports offers, fresh fruit, cereal, mineral water, tea and coffee
- You are invited to personal development through workshops, conferences, language courses, advanced training and webinars
- Our office is easily accessible by public transport (our "Kuehler Grund" bus stop is on campus); by car (5 minutes from the A5 exit); and by bike (covered bicycle parking space and warm showers are available)
- International customers and partners in almost 100 countries
- Great colleagues - our "orange" team is international and welcoming
- A pleasant and modern working environment in a company that develops positively even in challenging times and invests in the future
- Suggestion-based work and the opportunity to implement creative ideas

As an ERP Supervisor / Administrator (m/f/d), you will be responsible for:

- Maintenance of our Comarch ERP Enterprise 6.1
- Conception and implementation of interfaces and external applications in cooperation with your colleagues from software development
- Optimization of processes in cooperation with the departments
- Advice on process changes and assessment of the fit with the functions of the ERP
- Customize receipts with Crystal Reports

Role requirements as an ERP Supervisor / Administrator (m/f/d):

- Computer science degree or apprenticeship
- Enthusiastic about process optimization and automation
- Experience in the support for ERP systems at international B2B trading companies
- Knowledge in procurement, warehousing, ATLAS, order processing and tax determination
- Knowledge of creating Crystal Reports, SQL queries and operating Microsoft SQL servers
- File and interface formats such as CSV, JSON, XML, SOAP, REST and good knowledge of Excel
- Good knowledge of German and English

If this role aligns with your skills and experience, please send your complete application, including salary expectations and desired starting date, to:

jobs@flexoptix.net

We look forward to reviewing your application!
