We are looking for a new software developer (m/f/d)
Full-time position

Mobile Software Engineer, Senior
full-time position

For over twelve years, Flexoptix has been successfully active in the fiber industry. Specializing in transceiver solutions, we occupy a growing niche market. With over 50 colleagues, we are working together to deliver excellent products and service to our customers. And because we are constantly growing, we need you!

Responsibilities:

- Coding and maintaining of native iOS Apps.
- Coding and maintaining of native Android Apps.
- Connecting the Apps with our self-developed hardware.

Qualifications:

- Degree in computer science or equivalent experience.
- Excellent knowledge in **native iOS** and **native Android** development!
- Excellent knowledge in Swift, and good knowledge in SwiftUI.
- Excellent knowledge in Kotlin.
- Experience with USB and Bluetooth communication.
- Experience with hardware-oriented development is a strong asset.
- Ability to work autonomously, structured and goal-oriented in a team.
- Excellent spoken and written English, German is an asset.

What we offer:

We are known for being pragmatic and like to think outside the box, which helps us to find creative and scalable solutions for technical problems. If you can identify yourself with that and have fun communicating with customers and colleagues, we can offer you an environment where you can actively shape your team and scope of work.

Apply now!

Please send your application to our HR department for an initial chat: jobs@flexoptix.net. We are looking forward to meeting you in person. 😴
